

FRENCH OAK JOINERY MATERIAL

French oak is hard, heavy, strong, and lends itself well to taking finishes. Its distinctive texture, pattern and coloring give it a striking appearance that captures the eye. Each French oak plank can be identified by an unmistakable “cathedral” grain structure. French oak offers a contemporary twist that serves as the foundation for many design styles. We offer solid French Oak only

SOURCING AND HISTORY

Our French Oak is born from one family's dedication to its craft and our dedication to sourcing the world's finest timber. Although modern techniques have been developed, our partner mill in France still employs centuries-old techniques. Our French Oak is unlike anything else in the Australian market. Sourced from a single origin in the Burgundy region of France, we can guarantee quality and consistency using oak cultivated for over 200 years.
